DETAILED ACTION

Remark

1. Claims 7-14 have been added, and claims 1-14 are pending for reconsideration.

Allowable Subject Matter

2. Claims 1-14 have been allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The prior art of record to Bender fails to teach or suggest each and every feature of the present invention for a method of adaptively controlling a forward data rate in a wireless communication system, the method comprising steps of: detecting a channel status according to a pilot signal received from a base station; calculating a delay time, the delay time equaling a time interval between reception of a pilot signal and reception of a data signal; determining a target forward data rate based on the calculated delay time and the channel status; and transmitting the determined target forward data rate to the base station and similarly in method claims 2 and 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kurhila (PTO-892) discloses a different approach in detecting channel status.
